📍 **CABA, Argentina**

Programming languages

JavaScript	TypeScript
Python	Java
C++	Smalltalk
SQL	Neo4J
Go	C

Tools

Git – GitLab
React – React Native
Postman
Figma
Adobe Illustrator
Adobe Photoshop
Spark AR

Languages

English C1–Advance
Spanish native

Skills

Team–Work
Critical Thinking
Creativity
Organization
Prioritizing work activities to reach goals.

Experience

Feb 2022 – Jun 2023
Front-end Development • Amalgama

Development of Mobile App for **iOS** and **Android**. Technologies and tools: **React Native**, **Typescript**, **Javascript, Jest, Git, Gitlab and agile methodologies.**

Feb 2020 – Mar 2022
Graduate Teaching Assistant at Algorithms and programming II • Faculty of Engineering UBA

Grading of Abstract Data Type and Data Structure, mainly in function of algorithmic complexity elections. **Mentoring** new assistants on the correction of student deliveries. **Giver of lessons**. **Testing** development in order to determine admissions. Design of exam exercises. Students and new assistants **consulting assistance**. Contribute to the internal organization.

Education

2018 – Present
Software engineer • University of Buenos Aires

Acquired knowledge: Data bases, Data Science, Networking, design of APIs and programs within the paradigm of structured, object–oriented and functional programming, Project Management, Mobile and Web development, etc.

2019
Data Science • Digital House

Data analysis and visualization. Supervised and unsupervised learning. Text classification. Time series analysis. Probability and statistical inference. Solving regression and classification problems.

2017–2018
Development Web Front-End • Aprendé programando

2016–2018
Robotics, Audiovisual and Graphic Design Courses • Puerta 18
